

Sustainable Solutions for Omnichannel Distribution

Q4 2022

DISPENSING CLOSURES

DISC TOP GO: The first disc top in the market designed specifically for omnichannel distribution packaging needs. The unique, three-part design features a built-in twist to lock ring that prevents leakage or accidental actuation while in transit.

QUICKFLIP: An HDPE pouch spout for flexible packaging that features an innovative and differentiated design for on-shelf appeal. QuickFlip is an e-commerce capable** solution thanks to its tamper evident feature and available with our patented SimpliSqueeze® valve for controlled dispensing and clean cut-off.

E-SIMPLICITY: A flip top closure that features an integrated tamper evident tear band and is ideal for safe and controlled dispensing. It is available in two different orifice sizes: 3mm, 6mm and available with SimpliSqueeze® or Squeeze & Spray valve technology. E-Simplicity is available in Post-Consumer Recycled Resin (PCR) and ISCC Certified Mixed Recycled Resin and is ISTA-6 certified.

PURITY LITE: An innovative HDPE tube top that creates a fully recyclable* package when paired with an HDPE or PE tube. The closure features a unique, low-profile design for a sleek look, and is up to 47% more lightweight compared to a standard tube top.

* Fully recyclable when paired with a PE, PET, or HDPE tube or bottle. Final packaging may vary. Please confirm bottle material with us prior to making additional sustainability claims.

** ISTA-6 Overbox Testing Compliant. Test results may vary based on container shape, container size and sample formula.

LOTION PUMPS

FUTURE: an award-winning fully recyclable* and e-commerce capable** dispensing pump, Future's innovative design features an integrated lock/unlock ring and a 360° free-rotating actuator that helps minimize the risk of breakage during transport. Future is suitable for a range of viscosities, can be customized with two dosage and neck size options, and is available in a variety of colors thanks to its unique three-part design.

HIFLOW: a large dosage dispensing pump designed specifically to address omnichannel distribution challenges. The actuator design helps reduce the risk of breakage, and features a lock-down system to prevent actuation during transport. HiFlow also features a metal-free pathway to ensure optimal formula compatibility and is shower proof, preventing water regression.

EUROFLOW: the patented EuroFlow® technology provides reliable, consistent dosage in a familiar, user-friendly design. EuroFlow is a versatile, e-commerce capable** dispensing pump made for a wide range of viscosity products and is available in shower proof designs.

AEROSOL ACCESSORIES

APOLLO: an award-winning, e-commerce capable** aerosol dispensing solution that offers two distinct spray patterns in one product. The twist-to-lock, hoodless design is manufactured utilizing 44% less resin compared to a standard aerosol actuator and over cap.

GLIDE: a uniquely designed aerosol dispensing solution that combines one-handed dispensing with on-the-go product security. Its hoodless, twist-to-lock design offers an intuitive swiping motion and multiple sensorial cues through an intuitive locking/unlocking swiping motion. Glide is e-commerce capable** and manufactured utilizing 58% less resin compared to a standard aerosol actuator and over cap.

* Fully recyclable when paired with a PE, PET, or HDPE tube or bottle. Final packaging may vary. Please confirm bottle material with us prior to making additional sustainability claims.

** ISTA-6 Overbox Testing Compliant. Test results may vary based on container shape, container size and sample formula.

AIRLESS PACKAGING

MACRO: a bottom-fill airless package for high-viscosity formulas. The airless technology guarantees formula protection and features excellent product evacuation rate and 360° dispensing. Macro is available with a wide range of actuators and decoration options.

SPRAY PUMPS

PZ TWIST: our new sustainable, easy-to-use and high performance spray pump. PZ Twist features twist-to-lock technology so no cap is needed, and is ideal for sun care and hair care applications. It is available in Post-Consumer Recycled Resin (PCR).

MINI PACKAGING

PACTO: a mini package designed for on-the-go use. At 8.15cm tall, this 25 ml pack takes up minimal space and provides over 140 dosages.

IMAGIN: a resealable, ultra-flat mini packaging solution that dispenses a real fragrance experience. Imagin is ideal for extensive branding, e-commerce capable** and suited for sampling, trial sets, and omnichannel distribution.

* Fully recyclable when paired with a PE, PET, or HDPE tube or bottle. Final packaging may vary. Please confirm bottle material with us prior to making additional sustainability claims.

** ISTA-6 Overbox Testing Compliant. Test results may vary based on container shape, container size and sample formula.
